### PROFILE

I'm a passionate and results-driven web developer with a proven track record of building scalable and efficient web applications. My diverse skill set spans multiple technologies, with expertise in Laravel, PHP, MySQL, React, Node.js, and MongoDB. I thrive on solving complex problems, optimizing performance, and creating seamless digital experiences that drive business growth.

### WORK EXPERIENCE

- **PHP | Laravel Developer** MAY 2025 - PRESENT  
Mobit Solutions
  - I am currently working as a PHP Laravel Developer, where I actively contribute to both the development and maintenance of scalable web applications.
- **Full Stack Developer** March 2024 - April 2025  
Codeshah
  - As a Full Stack Web Developer, I was responsible for end-to-end development of scalable web applications across both frontend and backend stacks. I contributed to multiple complex projects involving real-time data processing, secure payment handling, and interactive user experiences. My core responsibilities include
- **Junior web Developer** Feb 2023 - March 2024  
KICS Department UET
  - As a Junior Web Developer, I contributed to the development and maintenance of web-based applications using PHP and Laravel at the foundational level.
